# PLEASE READ THE LABEL COMPLETELY BEFORE USE

This product MUST NOT be used for any purpose or in any manner contrary to the controls and conditions of registration.

# **Hazard Classification:**

Serious eye damage, Category 1.

#### **TOXICITY**

Causes serious eye damage.

### HANDLING PRECAUTIONS

Avoid contact with skin or eyes and inhalation of spray mist.

When handling wear eye protection, waterproof gloves, boots, and overalls. Do not eat, drink, or smoke while using. Remove protective clothing and wash hands and face thoroughly before meals and after work. Wash contaminated clothing and protective equipment before re-use.

### **STORAGE**

Store in the original container tightly closed and in a secure, dry, cool, well-ventilated area away from food, feedstuffs, and seeds. Protect from frost. Store in accordance with the current version of NZS 8409 Management of Agrichemicals.

#### DISPOSAL

Avoid contamination of any water supply or waterway/drain with product or empty container.

**Product Disposal:** Dispose of product only by using according to the label, or at an appropriate landfill. Dispose of unused spray mix and equipment cleaning water onto non-grazed and non-cropped ground away from edible and flowering plants. Do not allow product to enter waterways, drains, or sewers.

**Container Disposal:** Triple rinse empty container and add residue to spray tank. Recycle empty container via Agrecovery (www.agrecovery.co.nz) or to an approved landfill.

# **FIRST AID**

For advice, contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor.

If swallowed do NOT induce vomiting, Rinse mouth, Get medical advice if person feels unwell.

If splashed in eyes, wash out immediately with running water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. Get immediate medical attention. If skin or hair contact occurs, remove contaminated clothing and wash affected area with soap and running water. If skin irritation persists, get medical attention. If inhaled, immediately move to fresh air and rest. Begin artificial respiration if the victim is not breathing. Use mouth to nose rather than mouth to mouth and get medical assistance.

# **SPILLAGE**

Wear appropriate protective clothing and prevent material from entering waterways. Absorb spills with inert material and place in waste containers that can be sealed for disposal. Wash area with water and detergent, and absorb with further inert material such as sand, soil or sawdust. Dispose of waste safely in an approved landfill.

### **GENERAL INFORMATION**

Mesh dramatically reduces the losses from pod shatter before and during harvest. It does not slow down desiccation and has no adverse effect on maturity or quality of the seed produced. Mesh effectively reduces preharvest losses caused by 'normal' conditions. Thunderstorms, hailstorms and gales are not 'normal' but 'severe' weather conditions.

#### MIXING

Fill tank to three-quarters full with water and commence agitation. Add the required quantity of Mesh to the tank. Continue agitation while topping up tank and during spraying.

If preparing a tank with other products, always add Mesh after the desiccant, and/or adjuvant, water conditioner. **Compatibility:** Mesh can be applied with approved desiccants containing glyphosate or diquat.

# **CLEANING EQUIPMENT**

Provided Mesh does not dry out, it will not block filters or nozzles, but do not leave unwashed tanks overnight before cleaning.

If there is a break in spraying, and more Mesh is to be applied, fill up spray tank with water, and spray out sufficient volume to flush pump, spray lines and nozzles, then stop sprayer and top up with water.

After application of spray, rinse spray equipment with water and Lucid® sprayer cleaner and decontaminator or Tanksafe® tank cleaner.

Decontaminate cleaning product and Mesh from inside spray tank, pump, spray lines and nozzles by spraying out. For specific recommendations please contact AgNova Technologies NZ Ltd or its distributors.

# **DIRECTIONS FOR USE**

# It is an offence to use this product on animals.

Mesh should be applied at any time after the pods and seeds are full sized (BBCH 79, SB 5,9), up to before the pods are nearly all ripe, seeds black and hard (BBCH 89, SB 6,9) – optimally the pods are predominantly green.

# Rate of Use

Use Mesh at 1 litre per hectare.

Apply in 150-300 L/ha of water as a medium quality spray. Use the 300 L/ha water volume on dense crops or for maximum effect. In specific situations where you plan to use a high water volume please consult your agronomist.

# **SAFETY DATA SHEET**

If additional hazard information is required refer to the Safety Data Sheet available from your supplier.

# **CONDITIONS OF SUPPLY – Read before buying and using**

AgNova Technologies NZ Ltd shall not be liable for any consequential or other loss or damage relating to the supply or subsequent handling or use of this product, unless such liability by law cannot be lawfully excluded or limited. All warranties, conditions or rights implied by statute or other law which may be lawfully excluded are so excluded. Where the liability of AgNova Technologies NZ Ltd for breach of any such statutory warranties and conditions cannot be lawfully excluded but maybe limited to it re-supplying the product or an equivalent product or the cost of a product or an equivalent product, then the liability of AqNova Technologies NZ Ltd for any breach of such statutory warranty or condition is so limited.
